

# ABSTRACT

The present invention provides a resin composition comprising a thermoplastic resin and a polymer having, in the molecule, a structural unit represented by Formula (I):

(wherein n represents an integer of 2 to 1000; R<sup>1</sup> represents a substituted or unsubstituted lower alkyl, a substituted or unsubstituted cycloalkyl, a substituted or unsubstituted aryl, or a substituted or unsubstituted aralkyl; and R<sup>2</sup>, R<sup>3</sup>, R<sup>4</sup>, and R<sup>5</sup> are the same or different from one another and each represent a hydrogen atom, a substituted or unsubstituted lower alkyl, a substituted or unsubstituted cycloalkyl, a substituted or unsubstituted aryl, or a substituted or unsubstituted aralkyl, and when each of R<sup>1</sup>s, R<sup>2</sup>s, R<sup>3</sup>s, and R<sup>4</sup>s, represent two or more in number, they may be the same or different from each other, respectively) or the like.
